

This is an atypical proposal, because we ride two laps to the same mountain: **Oltá Mountain**.

But two laps are very different between them, because we ride in different levels of the mountain, offering us very different landscapes.

It's a short but intense route, without technical difficulty, in which the hardness is in our hands.

But in this route we can observe the bays of **Calpe** and **Altea** from Cumbres del Sol to the Serra Gelada, as well as the Bernia Mountain, or the Mascarat canyon from different perspectives that will surprise us.
